Choose any size container, but one with a drainage hole. Plant roots need air movement around them to remain healthy. Cover the hole with a piece of broken pot or stone to prevent soil from washing away.

Add a layer of Miracle-Gro® potting mix and insert the plant stem or root ball. Fill with more Miracle-Gro® potting mix. There should be ½-¾ inches of space from the top of the soil to the lip of the pot.

Water thoroughly to soak the potting soil, then allow to drain.

Fertilize immediately after potting or repotting with a quality plant food.

container garden

Follow these steps for your own beautiful container garden

1

Select a decorative container.

Baskets, bowls and pots can be used for your container garden. Terra cotta is popular as it's readily available and contrasts nicely with most plants. Sizes 12" and larger are preferred. Use quality potting soil for optimum plant growth.

2

Plant tall to short.

Anchor your garden with taller plants in the back and shorter ones in front. Ornamental grasses or tall growing annuals work great as container backdrops.

3

Enjoy all the flowers.

Water as often as necessary to maintain even soil moisture levels. Fertilizing every 6-8 weeks helps keep plants vigorous all-season.

4

What you need to get going:

Decorative planter or basket, potting soil, annuals or perennials and a watering can.

Annuals grow and bloom for one season and make excellent choices for borders or spot color in your perennial garden. Cultivate your planting bed to a depth of 6" and amend the soil with compost or peat moss. Plant the seedlings so the top of the rootball is level with the soil. Firm in and water thoroughly. Apply a layer of mulch to maintain moisture and discourage weed growth. Fertilize every four to six weeks. Remember to plant a few decorative containers for color accents around decks and walkways.

Soil should be well-drained, with full sun
at least 8 hours daily. Dig hole 18" deep
and 18" wide. Plant no deeper than in the
container. Mix in peat moss, composted
manure, ½ cup bone meal. Water as needed.

Fertilize monthly in season with a balanced
rose feed. Mulch year-round with leaves,
bark and woodchips.

Use KGRO® Rose & Flower Insect Killer for
insect control on roses, and KGRO® Multi-
Purpose Fungicide to control rose disease.

prepare your flower beds

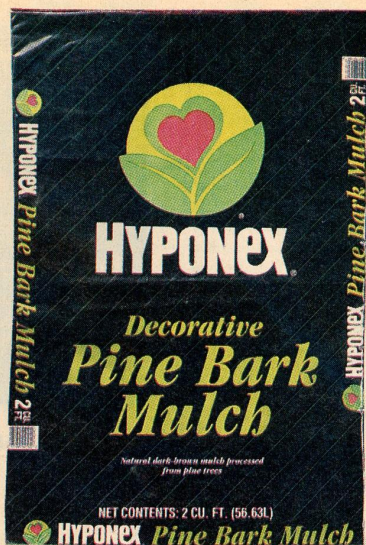

Follow these easy steps for a beautiful flower bed

- 1 Start with good soil. Improve clay soil with organic material such as Hyponex manure, organic humus or peat moss. You can also get this combined mixture in Scott's 3-in-1 Organic mix.
- 2 Mix the conditioners with the soil previously removed from the planting holes before replacing it around the plant roots.
- 3 Lightly water the bed one hour before planting. This makes the soil more workable for you and suitable for the plant.
- 4 Great for flower beds. Use Preen or Preen 'n Green to prevent weeds around bulbs, flowers, roses, shrubs and vegetables.

Finishing touches for your garden!

- 1 Remove weeds or grasses around established or newly planted trees, shrubs or rosebushes.
- 2 Apply landscape fabric, which allows water, fertilizer and nutrients to reach plants while blocking sunlight to stop weeds.
- 3 Apply Hyponex bark or mulch or rock products to a depth of 2 to 4 inches around each plant, covering the entire bed area.
- 4 A yearly addition of lesser amounts is sufficient to replenish the mulch or rock and improve appearance.
- 5 Put edging around bark or rock in garden to contain it, or to add the finishing touch.

Create a new look for your home

building tips

Easy steps to a beautiful retaining wall: You'll need a **round point shovel**, **level** and **garden gloves** before starting. . . .

- 1** Start with a level base. Dig a trench approximately 3-4" deep and 12" wide. Add 1" of sand to the trench to make leveling easier.
- 2** Lay base course using string line and level. Complete base course before proceeding to second course.
- 3** Lay first course level, aligning units side by side.
- 4** Stagger remaining courses. Connecting lip should overhang back edge of base. Backfill and pack soil as you complete each course of stones.
